

In this 90-minute interactive workshop, participants will explore advocacy as it relates to the promotion, sustainability, and expansion of school meals programs. We will explore a real-world advocacy success story and identify the key parts of a successful campaign. Working with regional partners, participants will have the opportunity to practice using data from the Global Survey Country Reports to inform the development of an advocacy plan.

To get the most benefit from this workshop, please complete the following three tasks prior to the workshop:

- 1.) Download and review your Global Survey of School Meals Country report at <https://gcnf.org/survey/>. Participants will refer to their country report during the workshop. If your country did not participate in the [Global Survey of School Meals Programs](#), you may not have a report. In that case, please download the blank country report.
- 2.) Review the 2019 Global Child Nutrition Forum Communique at <https://gcnf.org/events/forum/> to familiarize yourself with this potential advocacy tool.
- 3.) Download and review the School Meals Advocacy Plan Template

The following resource may be helpful to review before or after the workshop for further context and action.

[How School Meals Contribute to the Sustainable Development Goals – a collection of evidence](#)
